

# Upload slika

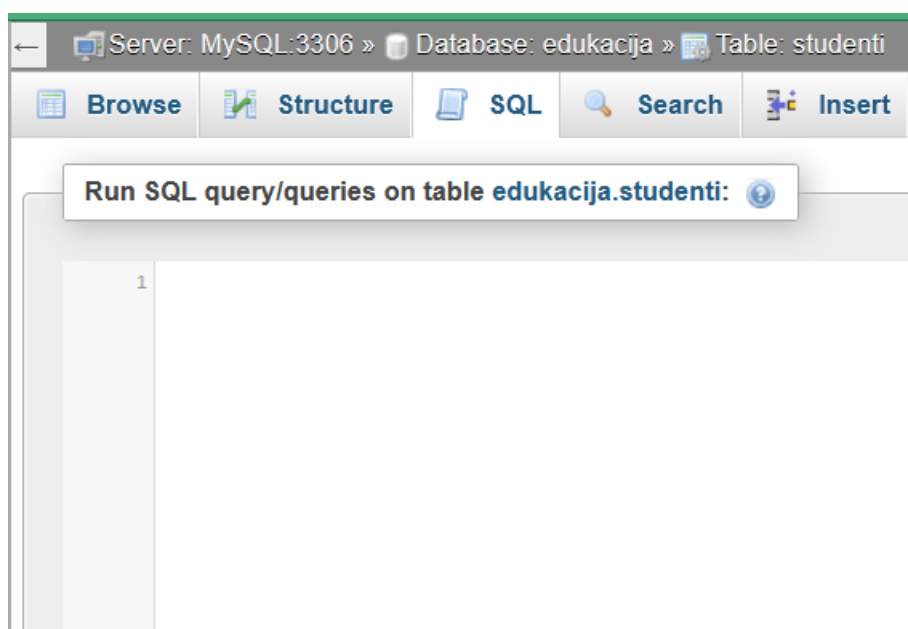

Koristeći HTML, PHP programski jezik i MySQL bazu podataka kreirati stranicu koja učitava sliku u bazu podataka, a nakon toga ispisuje poruku o uspješnom unosu i usmjerava na prikaz slika.

Nadovezati se na ranije vježbe gdje su kreirane baza edukacija i tabela slike.

Provjeriti preko alata phpmyadmin da li je kreirana baza edukacija, tabela studenti sa sljedećim poljima.

**Create database edukacija;**

```
CREATE TABLE studenti (  
  id int(11) NOT NULL AUTO_INCREMENT,  
  ime varchar(100),  
  prezime varchar(100),  
  adresa varchar(100),  
  slika longblob NOT NULL,  
  datum_prijave datetime,  
  PRIMARY KEY (`id`)  
)
```

Ako nisu kreirani, izvršiti odgovarajuće upite.

Uraditi alter table studenti za polje datum\_prijave.

**ALTER TABLE studenti**

**MODIFY COLUMN datum\_prijave datetime NOT NULL DEFAULT current\_timestamp();**

Razdvojiti PHP i HTML datoteke. Kreirati folder **upload** unutar početnog foldera WAMP servera **www**.

U Visual Studio alatu prvo kreirati HTML datoteku koja sadrži formu za unos.

Kreirati HTML fajl sa sljedećim sadržajem gdje su učitani grid.css i bootstrap datoteke.

## Index.html

```
<html>
  <head>
    <title>Upis studenta: </title>
    <link rel="stylesheet" type="text/css" href="grid.css">
    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/css/bootstrap.min.css"
rel="stylesheet">
  <script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/js/bootstrap.bundle.min.js"></script>
  </head>
  <body>

    <div class="sadrzaj">

      <div class="header">
        <nav class="navbar navbar-expand-lg navbar-light bg-light">
          <a class="nav-link" href="index.html">Home</a>
          <a class="nav-link" href="unos.html">Unos</a>
          <a class="nav-link" href="prikaz.html">Prikaz</a>
          <a class="nav-link" href="about_us.html">About us</a>
        </nav>
      </div>
      <div class="sidebar_left">Sidebar Left</div>
      <div class="sidebar_right">Sidebar Right</div>
      <div class="content">

      </div>
      <div class="footer">

      </div>

    </div>

  </body>
</html>
```

HTML datoteka **unos.html** treba da sadrži sljedeće tagove:

```
<html>
  <head>
    <title>Upis studenta: </title>
    <link rel="stylesheet" type="text/css" href="grid.css">
    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/css/bootstrap.min.css"
rel="stylesheet">
  <script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/js/bootstrap.bundle.min.js"></script>
  </head>
  <body>

    <div class="sadrzaj">

      <div class="header">
        <nav class="navbar navbar-expand-lg navbar-light bg-light">
          <a class="nav-link" href="index.html">Home</a>
          <a class="nav-link" href="unos.html">Unos</a>
          <a class="nav-link" href="prikaz.html">Prikaz</a>
          <a class="nav-link" href="about_us.html">About us</a>
        </nav>
      </div>
      <div class="sidebar_left">Sidebar Left</div>
      <div class="sidebar_right">Sidebar Right</div>
      <div class="content">
        <fieldset>
          <legend>Podaci</legend>
          <form method = "post" action = "insertstudent.php" enctype="multipart/form-data">
            <table width = "400" border="0" cellspacing="1" cellpadding = "2">
              <tr>
                <td width = "100">Ime studenta</td>
                <td><input name = "ime" type = "text"
id = "ime" required></td>
              </tr>
              <tr>
                <td width = "100">Prezime studenta</td>
                <td><input name = "prezime" type = "text"
id = "prezime" required></td>
              </tr>
              <tr>
                <td width = "100">Adresa studenta</td>
                <td><input name = "adresa" type = "text"
id = "adresa" required></td>
              </tr>
              <tr>
                <td width = "100">Datum prijave </td>
                <td><input name = "datum" type = "date"
id = "adresa" required></td>
              </tr>
            </table>
          </form>
        </fieldset>
      </div>
    </div>
  </body>
</html>
```

```

        </tr>
        <tr>
            <td width = "100">Unesi sliku</td>
            <td><input name = "slika" type = "file"
                id = "adresa" required></td>
        </tr>
        <tr>
            <td width = "100"> </td>
            <td>
                <input name="dodaj" type="submit" id ="dodaj"
                    value = "Dodaj studenta">
            </td>
        </tr>
    </table>
</form>
</fieldset>

</div>
<div class="footer">

</div>

</div>

</body>
</html>

```

Kreirati konfiguracijski fajl za bazu podataka pod imenom **db\_konfiguracija.php** koji se može koristiti i učitati u drugom php fajlu pod imenom **insertstudent.php**.

```
<?php
```

```
//Konfiguracija baze podataka
```

```
$dbHost = "localhost";
```

```
$dbUsername = "root";
```

```
$dbPassword = "";
```

```
$dbName = "edukacija";
```

```
//Kreiranje objekta za povezivanje sa bazom podataka
```

```
$db = new mysqli($dbHost, $dbUsername, $dbPassword, $dbName);
```

```
//Provjera veze sa bazom podataka
```

```
if ($db->connect_error) {  
    die("Nema konekcije. " . $db->connect_error);  
}
```

Datoteka **insertstudent.php** ima sljedeći sadržaj:

```
<?php  
    if(isset($_POST["dodaj"])) {  
        $dbhost = "localhost";  
        $dbuser = "root";  
        $dbpass = "";  
        $database="edukacija";  
        $conn = new mysqli($dbhost,$dbuser,$dbpass,$database);  
  
        $ime = $_POST['ime'];  
        $prezime=$_POST['prezime'];  
        $adresa = $_POST['adresa'];  
        $datum = $_POST['datum'];  
        //$slika=$_POST['slika'];  
        //$sql = "INSERT INTO studenti ". "(ime,prezime,datum_prijave, adresa, slika) ".  
"VALUES('$ime','$prezime', '$datum', '$adresa','$imgContent')";  
  
        $status = $statusMsg = '';  
  
        $status = 'error';  
        if(!empty($_FILES["slika"]["name"])) {  
            // Get file info  
            $fileName = basename($_FILES["slika"]["name"]);  
            $fileType = pathinfo($fileName, PATHINFO_EXTENSION);  
  
            // formati slika koji su podržani  
            $allowTypes = array('jpg','png','jpeg','gif','webp'); // niz u php-u  
            if(in_array($fileType, $allowTypes)){  
                $image = $_FILES['slika']['tmp_name'];  
                $imgContent = addslashes(file_get_contents($image));  
                $sql="INSERT INTO studenti ". "(ime,prezime,datum_prijave, adresa, slika) ".  
"VALUES('$ime','$prezime', '$datum', '$adresa','$imgContent')";  
                // Unos podataka u polja tabele studenti  
                //Za unos vremena može se koristiti NOW()  
                $insert=$conn->query($sql);  
  
                if($insert){  
                    $status = 'success';  
                    $statusMsg = "Fajl je uspješno dodan.";  
                }else{
```

```

        $statusMsg = "Fajl nije dodan. Pokušajte ponovo.";
    }
}else{
    $statusMsg = 'Samo JPG, JPEG, PNG, GIF i webp fajlovi su dozvoljeni za upload.';
}
}else{
    $statusMsg = 'Odaberi sliku za upload.';
}

    if($conn->query($sql)){
        echo '<script type="text/javascript">alert("Podaci su uneseni
uspješno.");</script>';
    }
    if ($conn->errno) {
        header("Location: index.html");
        echo '<script type="text/javascript">alert("Podaci nisu ispravno
uneseni.");</script>';
    }

    header("Location: prikaz.html");
    $conn->close(); //Zatvara se komunikacija sa bazom podataka

    }
?>

```

Datoteka **prikaz.html** prikazuje podatke iz baze iz tabele studenti.

```

<html>
